Sound power level (outside)

Refrigerante R32 GWP Refrigerant leakage contributes to dimate change. Refrigerant with lower global warming potential (GWP) would

contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 675. This means that if 1kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1kg of CO2, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself

and always ask a professional.

SCOP

SEER 6.1 Α" Energy efficiency class

Design load (Pdesignc) 7.9 kW Energy consumption. 453 KWh per year, based on standard test results.

Actual energy consumption will depend on how the appliance is used and where it is located. Heating mode (Average)

SCOP

4.0 A" Energy efficiency class Design load (Pdesignh) 5.8 kW (-10°C) Declared capacity 5.5 kW (-10°C) **WW** (-10°C)

Back up heating capacity Energy consumption. 2030 kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.

Heating mode (Warmer) Optional

46 Energy efficiency class Α.. kW (2°C) Design load (Pdesignh) 5.9 Declared capacity 59 kW

Back up heating capacity 0.0 kW (2°C) 1795 Energy consumption. kWh per year based on standard test results.

Actual energy consumption will depend on how the appliance is used and where it is located.

kW

Heating mode (Colder) Optional

SCOP 4.6 Energy efficiency class Α** Design load (Pdesignh) kW (-22°C) 4.8 (-22°C)

Declared capacity 4.1 Back up heating capacity 0.7 kW (-22°C) Energy consumption, 2800 kWh per year.based on standard test results.

Actual energy consumption will depend on how the appliance is used and where it is located.
